

CALLING ALL ELECTRIC CONSTRUCTION PIONEERS...

ELECTRIC CITIES NEEDS YOU!

As part of our research into the future of emission-free construction, we're looking to speak to construction contractors and workers taking their first steps towards electrified working.

If you're a site manager or construction worker currently using fully-electric compact excavator equipment in the UK or EU we'd love to hear how your work is changing with the move to electrical. We can offer a cash incentive for taking part in a research interview. Ideally, we'd visit you on site so you can show us your work (but we can also explore other options if this is not possible).

If you are interested in taking part, please contact us as soon as possible:
