

Morning Vicky

The overall length refers to the **vehicle** which is defined in 5(a) as a **wheeled engineering plant**.

See also paragraph 14(3), Part 3, Schedule 3 of the STGO.

Regards

Cxxx

Morning Cxxx,

Thank you for this, I have one question,

What is meant by the overall length of the vehicle in 5 (c) is the 8m, referring only to length of the NRMM or the combination of NRMM and trailer?

Could you confirm please?

Kind Regards,

Vicky

Subject: [EXT] RE: Trailer towing

This message originated from outside your organization

Hi Vicky,

We have now finalised the VSO. Please see attached a draft VSO permitting wheeled engineering plant vehicles (EP) with an overall length that does not exceed 8 metres to tow trailers that carry materials and tools for road construction and repairs and increase their permitted speed to 20 miles per hour on non-motorway roads.

We would welcome your comments and observations.

Regards
