BREAKING NEWS

UK Government report admits there are 23.5 Million people in England who have NOT had a single dose of a Covid-19 Vaccine

BY THE EXPOSÉ ON DECEMBER 17, 2021 • (64 COMMENTS)

Listen Now

For months the British public have been deceived with tales that there are just 5 million people in the United Kingdom who have refused to take up the offer of a Covid-19 vaccine. But today we can reveal that this is a lie.

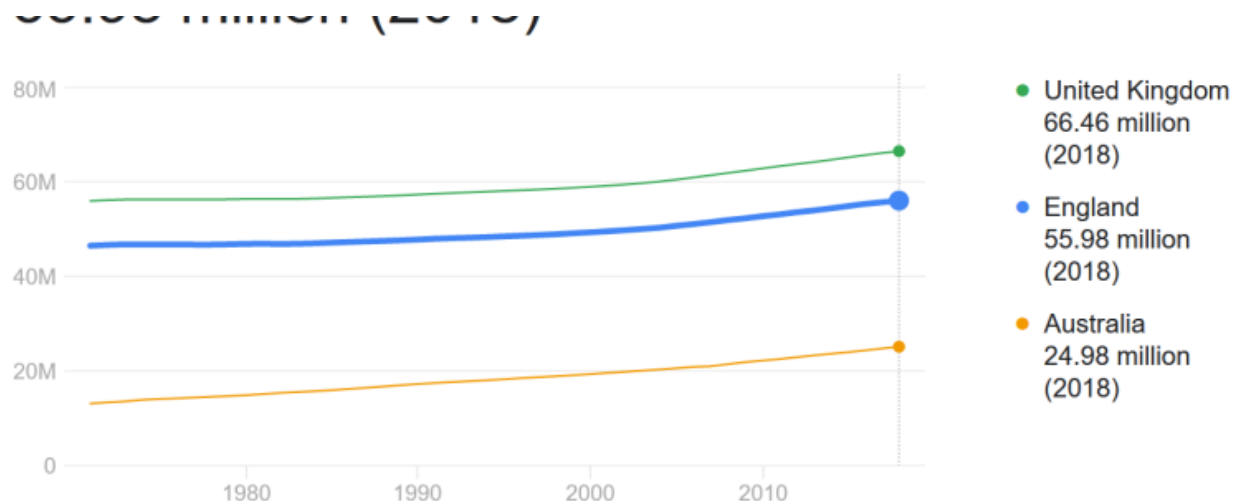

It is a complete fabrication that has no doubt been used to make those who have refused the jab feel as if they are part of a minority, because an official UK Government report proves that in England alone there are approximately 23.5 million people who have not had a single dose of a Covid-19 vaccine.

[Donate](#)

It was back in September that the British [public were told there were 5 million Brits](https://www.bbc.co.uk/news/uk-58560031) (<https://www.bbc.co.uk/news/uk-58560031>) who had so far refused the experimental jabs. Sir Patrick Vallance, the UK's Chief Scientific Advisor and former president of GlaxoSmithKline, announced in a televised Covid-19 briefing that "There are five million or so people who are eligible for vaccines now who haven't been vaccinated,".

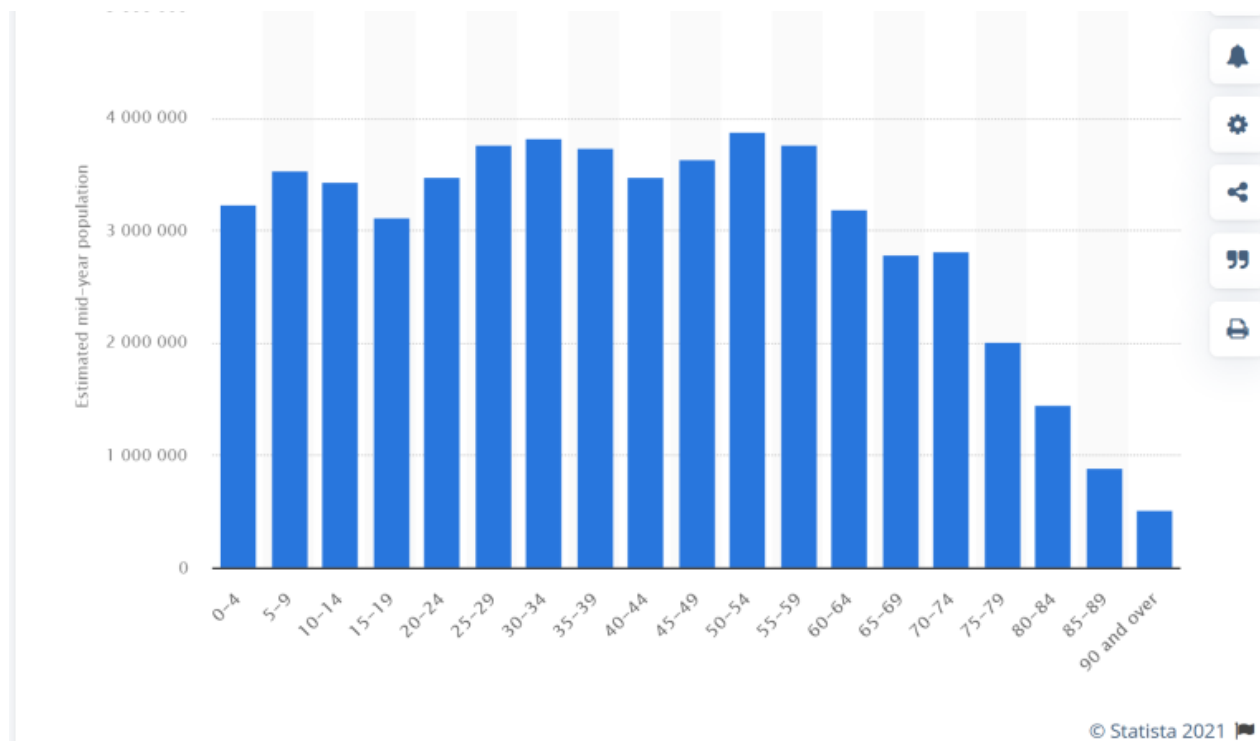

Well it turns out the "or so" make up approximately another 10.3 million people in England alone as of December 17th 2021, bringing the grand total of people eligible to have the Covid-19 jab to 15.3 million, and 23.5 million when including all children under the age of 12.

The population of England is approximately 56 million, and according to 'Statista' the 2020 figures (<https://www.statista.com/statistics/281208/population-of-the-england-by-age-group/>) show that approximately 3.23 million of those are aged 4 and under, and a further 3.54 million are aged between 5 and 9.

Source

The Statists site also states that approximately 3.44 million are between the ages of 10 and 14, so if we divide that number equally by five and then times by two we can roughly work out the number of 10 and 11 year old children and work out the total population of England eligible for a Covid-19 injection, which is of course everyone over the age 12.

That equation totals 1.38 million, therefore in England, there are approximately 8.2 million children under the age of 12, and 47.8 million eligible for Covid-19 vaccination.

Which brings us to the [UK Health Security Agency Week 50 Vaccine Surveillance Report](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/1041593/Vaccine-surveillance-report-week-50.pdf).

(https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/1041593/Vaccine-surveillance-report-week-50.pdf).

[report-week-50.pdf](#)) they publish a section on 'Population impact' of the Covid-19 vaccines, and it interestingly states that 'by 12th December 2021, the overall vaccine uptake in England for dose 1 was 67.9% and for dose 2 was 62.2%.'

The report also clearly states that uptake for dose 3 was 31.4%.

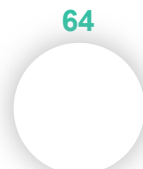

Population impact

The impact of the vaccination programme on the population is assessed by taking into account vaccine coverage, evidence on vaccine effectiveness and the latest COVID-19 disease surveillance indicators.

Vaccine coverage tells us about the proportion of the population that have received 1, 2 and 3 doses of COVID-19 vaccines. By 12 December 2021, the overall vaccine uptake in England for dose 1 was 67.9% and for dose 2 was 62.2%. Overall vaccine uptake in England in people with at least 3 doses was 31.4%. In line with the programme rollout, coverage is highest in the oldest age groups.

Source – Page 3

Here's how those percentages translate in terms of the actual population of England –

(UKHSA Vaccine Surveillance Report – Week 50)				
Dose	Uptake (%)	Population Vaccinated	Population Not Vaccinated (Eligible)	Total Population Not Vaccinated
1	67.9%	32.4 million	15.3 million	23.5 million
2	62.2%	29.7 million	18.1 million	26.3 million
3	31.4%	15 million	32.8 million	41 million

As we can see from the above according to the UK Health Security Agency report, 32.4 million people have had a single dose, 29.7 million people have had a second dose, and 15 million people have had a third dose as of December 12th 2021.

This means there are 23.5 million people who have refused to partake in the largest real-world experiment ever conducted, not just 5 million that has been claimed for months and used to write discriminatory articles such as this one from journalist Andrew Neil –

It's time to punish Britain's five million vaccine refuseniks: They put us all at risk of more restrictions, says ANDREW NEIL. So why shouldn't we curb some of their freedoms?

Source

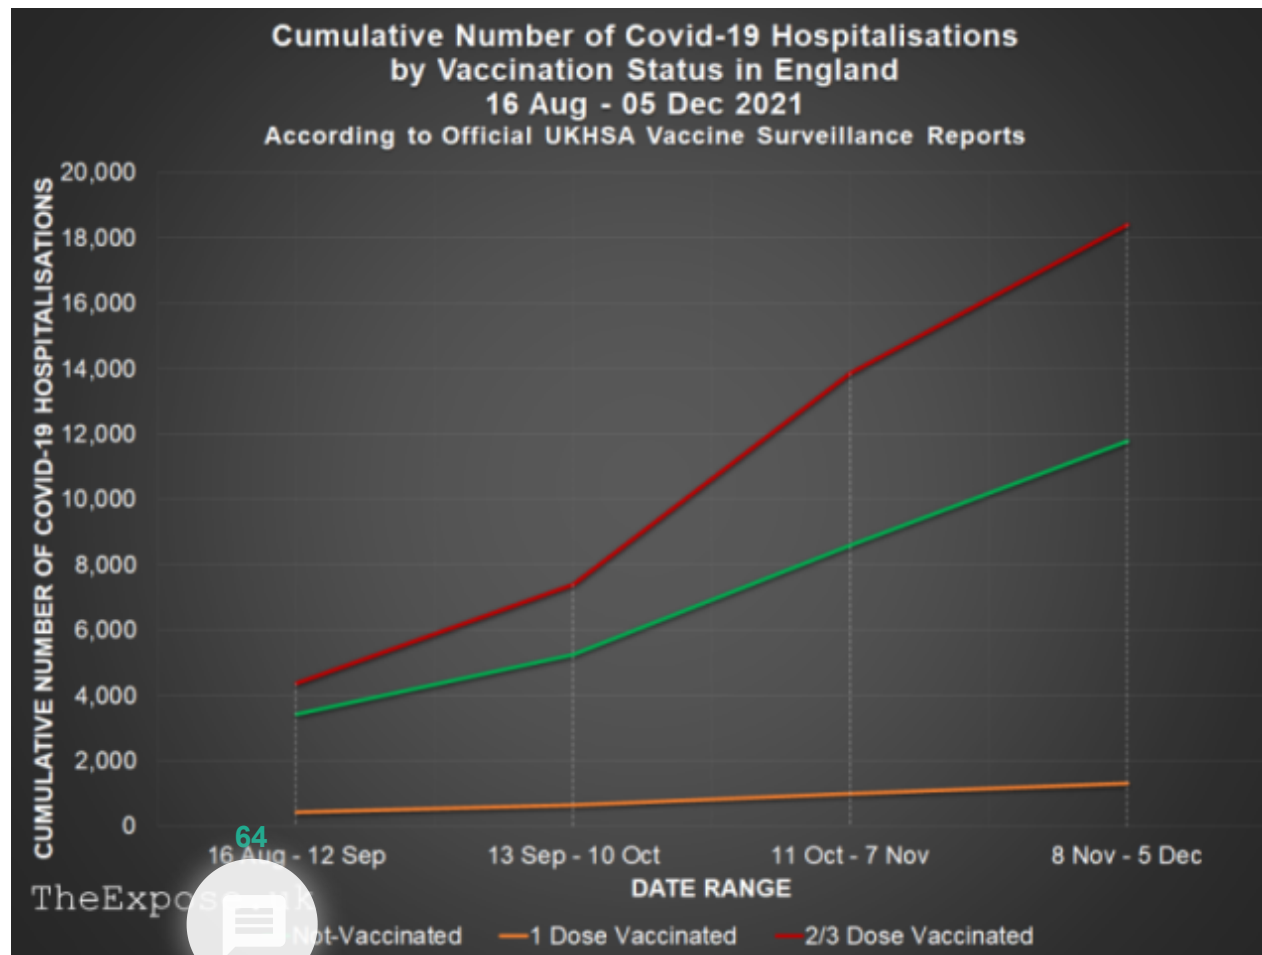

“There are still 5 million unvaccinated British adults, who through fear, ignorance, irresponsibility or sheer stupidity refuse to be jabbed. In doing so they endanger not just themselves but the rest of us.” wrote Andrew Neil for the Daily Mail.

Between Aug 16 and Dec 05, the unvaccinated population accounted for 11,767 Covid-19 hospitalisations. But the vaccinated population accounted for nearly double the amount, recording 19,730 hospitalisations, with 18,406 of those being among the 2/3 dose vaccinated population. This means the vaccinated population have accounted for 63% of Covid-19 hospitalisations since August 2021.

It gets even worse for the vaccinated population when it comes to deaths though.

Between 16 Aug 21 and 05 Dec 21 there were 3,070 Covid-19 deaths among the unvaccinated population in England, compared to 12,058 deaths among the vaccinated population during the same time frame. That is a 293% difference.

difference whatsoever..

The deaths however, yet again have to be calculated in proportion to covid positives in both groups. And here, judging by official data vaxxed die 5 per 1000 sick, whereas unvaccinated 1/1000. This is evident from variants of concern report.

The whole thing is a lie because everyone who goes to the hospital for any reason is tested. If the fake PCR test comes back as a false positive, then they are considered to be a covid hospitalization even if they are there for a car accident, gunshot wound, or cancer.

If had one vax, you're not vaccinated

If you had the second less than 15 days ago, your not vaccinated

In other words, if you get jabbed and drop dead the next day, it counts as a non-vaccinated death

To give it a second thought, this news even better! The placebos! The truly vaxxed' number is even more low. Which by the way makes the poison more deadly if you look at the full picture. This is what O'Looney (G. bless him) told, based on what he saw, clusters of deaths after vaccines in the affected age group, he estimated 75-80% placebos or so (can't recall the exact number he said).

But if they are panicking now, the boosters will be worse.

I am always befuddled by your spreadsheets which imo can oftentimes be confusing! Here is my take on the subject of unvaxxed, please correct if I am wrong... As you state 68% of populous have at least 1 injection... Therefore 32% unvaxxed, of these approx' 10% are under 12y.o. So unvaxxed over twelve years old = $68000000 \times .32 \times 0.9 = 19,584,000$. Not 23.5M as you stated

-6

Reply

Lords Witnesses

🗨️ Reply to Ar25pro

🕒 19 hours ago

Are you for real or just trying to create confusion?

15.3 million unvaxxed over 12 + 8.2 million under12s (ineligible for vax)

equals 23.5 million

64

What part of that equation do you fail to understand?

There are 56m in England less 8.2m under 12s = 47.8m NOT 68 m

$47.8m \times .32 = 15.3 m$ unvaxxed

5

I am also confused. Further down it states 52 million have had at least one jab. Leaving 14-15 million with pure uncontaminated blood, if the population of the UK is indeed 66-67 million.

Does it need to be more complicated than that?

The fact that there are 3 (or 4) times the number of sane people in the country that the rulers have told us is extremely heartening.

Peace.

diabetes,infertility and cancer – what could possibly go wrong?

You could by accepting and using a globalist vaccine passport be branded as a slave of Satan with the Mark of the Beast, fail the sheep and goats test of Matthew25 and go straight to hell.

Yes but apart from heart attacks, AIDS, uncontrollable shakes, blindness, organ failure, type 1 diabetes,infertility, cancer, the Mark of the Beast and going straight to hell – what could possibly go wrong?

You could lose your sense of taste and smell so that all food tastes like boiled chicken and all wine tastes like new world plonk – Oh My God, that would be horrific! Cancel my vaccine appointment now!

I watched a majority of the special session of MPs scrutinising the Health and Security Agency that when pressed told MPs that it was 5 million and of that 5 million, 1 million was due to existing known health conditions.

Throughout, most of the MPs didn't sound or look like they believed a word of what the so-called experts were saying to them. In addition, to the representatives from the Health and Security Agency, there was a guy from Moderna really hyped up on Omicron and Delta etc. I was just waiting for one of the MPs to say, "but you are selling vaccines for an American company, isn't your advice biased?".

I am not sure this article is quite correct although I am a huge fan of the Expose.

I think it is just very poor grammar from UK Gov.

“Around 45.9 million people have received 2 doses (79.9%) and around 50.5 million people have received one dose (87.7%) (*I think they mean in the UK not just England here*), with around 7 in 10 over 80s in England already vaccinated with top-up jabs.”

The last bit after the comma is concerning England, but the first part is not. This would bring both numbers closer.

Sorry my last comment was misleading as refers to UK Gov recent comments that 50.5 million have received a first dose which is clearly lies. <https://www.gov.uk/government/news/over-11-million-people-receive-top-up-covid-19-vaccine> (<https://www.gov.uk/government/news/over-11-million-people-receive-top-up-covid-19-vaccine>). Think I need to go to bed

Yes, the “50m” figure must be referring to the UK. In the “Coronavirus vaccine – weekly summary of Yellow Card reporting” doc the figures for one dose are:

England 42,968,432

Wales 2,474,162

Northern Ireland 1,382,138

64 Scotland 4,358,725

This comes to about 51m. Shame the UKHSA don't make their stats clearer. I'm still looking at all these figures to see how they are getting to their percentages.

This is remarkable as this mirrors the similar results in a recent scotland report

Does UKHSA means that those figures are the 'uptake %' for the adult population over 18 only? Still, that would not equal '5m still unvaccinated'. An FoI is needed urgently on this topic. If true, this is big news (well spotted) though It does not chime with our personal experience of those around us, who have almost all had jabs. If it is true, the case and death statistics for vaxxed and unvaxxed are worse than we thought (for vaxxed).

more interesting question is whether this translates into erroneous calculation of rates of illness; larger pool of unvaccinated would reduce the rates for them;

This is so full of crap. To get the figures he was looking for he just took 10 million of the actual government figures so 42.6 million became 32 million and 39 million became 29 million. 42.6 million of 47.8 million =89.1% vaccinated with first dose (now over 90)

Andrew Neill needs to look at the figures for VACCINATED PEOPLE who are dying from the "COVID JAB" and how many people are dying from illnesses because they can't get to hospital nor be treated for their complaints.

Keith 3 hours ago

We NEED to make this more public so the public who aren't as brainwashed as most might, just might wake up & join the normal people on in this country.

English is not my 1st language but I prefer the original than traduction in French so I read and read again this article.

If you take count of the children, it is right that 23.5 millions persons have received NO vaccine. But do not agree when you say :**who have refused to partake in the largest ...** this is not correct because of the children.

But 15.3 millions adults have refused to have the jab :that is OK
